

Pre-Bid Clarification

1. Is the data sharing from various lines of business using API?

Ans: Yes, there will be APIs for business lines systems, however, certain manual data upload requirement might arise.

2. Can we know the specific number and type of data sources?

Ans: Data source would be business lines with DB in Oracle (up to 5 sources including manuals)

3. We understand that there will be one production environment, however, how many non-production environments such as Development, UAT and Test environment are required for DWH/BI?

Ans: we are looking at Production (live server) and Test/UAT environment.

4. What will be the user concurrency?

Ans: Maximum of 30 users at a time and may go higher during peak or year-end closing time.

5. What will be the user growth year on year?

Ans: No user growth expected for next 3 years at least.

6. Is there any report bursting capability required?

Ans: No such kind of requirement, if the performance and load could be managed during peaks.

7. How much data will flow in BI?

Ans: Data base size growth per day is insignificant and will depend on the data requirement for push toward DWH/BI. Our data growth in total is about 100-300 MB a day depending on the transaction taken.

8. How many Applications need to be built?

9. Our OEM don't provide perpetual licenses, will subscription-based pricing acceptable?

Subscription will be okay however, it has to be in terms of the RFP and renewals based on the term's requirement
